What Is Chief Fire Officer Designation?

The Fire Officer (FO) Designation Program was created to recognize fire officers who have demonstrated excellence and outstanding achievement throughout their career. The designation demonstrates that individuals have developed a strategy for continued career improvement and development. The highly competitive FO designation assures departments that their leaders have the educational and technical competencies necessary to meet the demands of today's society.

The National Professional Development Model, supported by the Fire and Emergency Services Higher Education (FESHE) Program, maps an efficient path for fire service professional development. It is supported by collaboration among fire-related training, higher education, and credentialing. The model shows FO designation as a credential to consider in the career progression to fire service executive.

There are 21 Fire Officers world-wide ~ Palm Bay Fire-Rescue has two of the 21.

Firefighter Ringleb is promoted to the position of Driver Engineer by Chief Abraira.

Driver Engineer Ringleb started with Palm Bay in October of 1995 and has been on the Acting Driver Engineer list since October of 2008.

His promotion was effective 1/11/11.
