GASOLINE SAFETY TIPS

Safety tips

- Keep gasoline out of children's sight and reach. Children should never handle gasoline.
- If fire does start while handling gasoline, do not attempt to extinguish the fire or stop the flow of gasoline. Leave the area immediately, and call for help.
- Do not use or store gasoline near possible ignition sources (i.e., electrical devices, oil- or gas-fired appliances, or any other device that contains a pilot flame or a spark).
- Store gasoline outside the home (i.e., in a garage or lawn shed) in a tightly closed metal or plastic container approved by an independent testing laboratory or the local or state fire authorities. Never store gasoline in glass containers or non-reusable plastic containers (i.e., milk jugs).
- Store only enough gasoline necessary to power equipment and let machinery cool before refueling it.
- Never use gasoline inside the home or as a cleaning agent.
- Clean up spills promptly and discard clean-up materials properly.
- Do not smoke when handling gasoline.
- Never use gasoline in place of kerosene.
- Use caution when fueling automobiles. Do not get in and out of the automobile when fueling. Although rare, an electrical charge on your body could spark a fire, especially during the dry winter months.
- Only fill portable gasoline containers outdoors. Place the container on the ground before filling and never fill containers inside a vehicle or in the bed of a pick-up truck.
- Follow all manufacturers instructions when using electronic devices (those with batteries or connected to an electrical outlet) near gasoline.
